

Zyris is proud to introduce:

HOOPLA™

The ultimate dental retractor.

“My patients love HOOPLA! They are so much easier to use than an Optragate. —Dr. Mollie R.”

Designed for comfort and ease, HOOPLA maximizes oral cavity access and visibility by gently retracting a patient's lips and cheeks during restorative, cosmetic, hygienic, and orthodontic procedures. This allows clinicians to complete more procedures in less time WITHOUT compromising on quality of care.

Who LOVES Using HOOPLA?

General Dentists

Speeds up anterior restorations, composites, crowns, veneers, bonding, and more by offering a clear and unobstructed view of the entire mouth.

Oral Surgeons

Streamlines grafting and implant placement procedures by ensuring a stable and open work area, crucial for the precision required in oral surgery.

Pediatric Dentists

Accommodates the diverse sizes of children's mouths with a flexible design, reducing the need to stock multiple sizes.

Periodontists

Keeps patients comfortable (and fully compliant) during invasive procedures such as frenectomies, guided bone regeneration, and pinhole surgery.

Endodontists

Makes root canal therapy faster, easier, and safer with quick adjustments and its ability to be removed and reinserted as many times as needed.

Orthodontists

Facilitates the adding and removal of buttons for clear aligners, placing brackets for traditional braces, as well as photography and scanning.

...and **MANY** more.

“It is a great device for hygienists and eliminates the need for a second pair of hands when working on patients. —Dr. K”

FLIP THE PAGE TO SEE FEATURES AND BENEFITS!

Features and Benefits

- ✓ Complete more procedures in less time
- ✓ Increased Clinician Comfort
- ✓ Easy Insertion & Re-insertion
- ✓ Increased Patient Compliance
- ✓ Effective Lip and Cheek Retraction
- ✓ Easier Dental Imaging

Single-Use (Avoid Cross-Contamination) ✓

Affordable and Practical for Clinics ✓

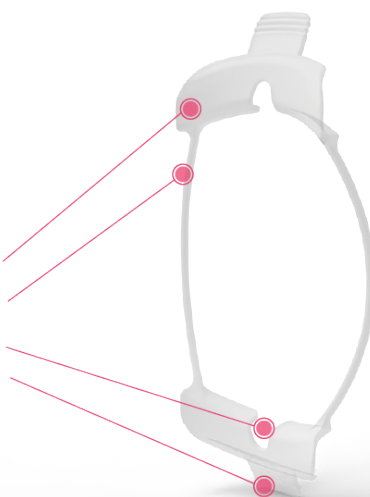

One-Size-Fits-Most ✓

Biodegradable ✓

BPA Free ✓

Stays in place ✓

- Non-slip Lip Retractor
- Cheek Retraction for Buccal Access
- Frenum Divot for Comfort
- Insertion & Adjustment Tab

The Numbers Speak For Themselves...

In our commitment to product excellence, Zyris conducted a comprehensive focus group study. We selected 25 experienced clinicians, each with over four years in the field and no prior usage of Isolite systems, to evaluate our new retractor. Feedback was gathered based on their use in 160+ procedures.

Here are the results:

1 Insert!

HOOPLA's super flexible material allows for easy, pain-free insertion, re-insertion and removal. This flexibility is crucial in minimizing discomfort and gag reflex in patients

2 Retract!

Once inserted, the retractor gently and effectively retracts the lips and cheeks, maintaining a clear operative field for the dentist. Its slight resistance coaches patients to keep their mouths open, resulting in longer and more comfortable procedures.

3 Adjust!

The tabs on the retractor allow for quick and easy adjustments during procedures, providing better access to different areas of the mouth as required. Stays in place better than other retractors.
